

ACCREDITATION INFORMATION

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of the American Board of Quality Assurance and Utilization Review Physicians (ABQAURP) and the Florida Academy of Pain Medicine.

The American Board of Quality Assurance and Utilization Review Physicians designates this educational activity for a maximum of 18.25 hours in Category 1 credit towards the AMA Physician's Recognition Award. Each physician should claim only those hours of credit he/she actually spent in the activity.

FLORIDA ACADEMY OF PAIN MEDICINE

ANNUAL CONFERENCE AND MEETING, June 11 – 13, 2004

Florida Society of Physical Medicine and Rehabilitation Spring Meeting

Florida Society of Interventional Pain Physicians Spring Meeting

Ritz-Carlton, Coconut Grove

Program, Faculty, Educational Objectives

Friday, June 11, 2004 -

Morning Workshops: 8 am – 12 pm

Use of the C-Arm in Injection Therapy for Pain Management of the Lumbar Spine

Robert D. Gruber, D.O., Physical Medicine & Rehabilitation, Florida Spine Institute

Clearwater, FL

At the end of this session, participants will be better able to use a C-Arm for imaging when providing injection therapy for pain in the lumbar spine.

(Cadaver Class)

Botulinum Toxin and Pain

Gary W. Jay, M.D., F.A.A.P.M., D.A.A.P.M., Neurology/Pain Medicine

Tamarac, FL

At the end of this session, participants will be better able to discuss the physiology and pharmacology of botulinum toxin; relate the pathophysiology of pain; perform techniques using botulinum toxin for the treatment of pain. *(Live Subject/s)*

Afternoon Workshops: 1 – 5 pm

Regenerative Injection Therapy

Felix S. Linetsky, M.D., Orthopedic Medicine, Pain Treatment, Clinical Associate Professor

Department of Family Medicine, Nova Southeastern College of Osteopathic Medicine, Assistant

Professor, Department of Anatomy, University of South Florida, College of Medicine

Palm Harbor, FL

Peter W. Taraschi, D.O., Family Practice/Pain Medicine, OMNI Healthcare

Palm Bay, FL

At the end of this session, participants will be better able to correctly diagnose chronic, painful conditions of the locomotive systems; identify normal & pathologic cross-sectional anatomy, as well as anatomical variations; discuss current literature which supports manipulation under local joint anesthesia, as well as a series of anesthetic blocks for diagnosis of somatic pain; perform the RIT procedure.

(Cadaver Class and Lecture)

Saturday, June 12 – Presentations: 8:15 am – 5 pm

8:15 – 9 am

Interventional Headache Management

Andrea M. Trescot, M.D., Anesthesiology/Pain Medicine, Director, The Pain Center
Orange Park, FL

At the end of this session, participants will be better able to identify some of the patterns of extracranial headaches; discuss some of the techniques of interventional headache management; compare the interventional techniques of cryoneuroablation, radiofrequency lesioning, botulinum toxin, and neurostimulation.

9 – 9:45 am

Traumatic Spinal Injuries

Richard J. Boehme, M.D., Neurology, Ph.D., Biomedical Engineering, Northeast Florida Neurology Clinics, Inc
Jacksonville Beach, FL

At the end of this course, participants will be better able to identify different types of spinal injuries caused by traumatic events; diagnose varying types of spinal injuries through thorough work up, including MRI; appropriately treat these injuries based on the findings.

10:15 – 11 am

Orofacial Pain

Ralph Garcia, Jr. D.D.S., Bay Area Center for Craniomandibular Disorders,
Temporomandibular Joint Disorders, Head/Neck/Facial Pain
Tampa, FL

At the end of this session, participants will be better able to list and describe craniofacial pain problems associated with TMJ (temporomandibular joint) disease; diagnose TMJ disease; discuss the societal impact of TMJ disease and craniofacial pain.

11 – 11:30 am

Pain in the Elderly

Laura J. Yard, M.D., Interventional Pain Medicine Assoc., Inc.

Venice, FL

At the end of this session, the participant will be better able to define chronic geriatric pain; recite statistics regarding the increase of elderly in the healthcare population and the prevalence of geriatric pain; consider the issues of comorbidity, mental status, sleep disturbance, depression, and medication/drug therapy when assessing and treating geriatric pain.

11:30 am – 12:15 pm

Medicare Update

James J. Corcoran, M.D., M.P.H., Medical Director, First Coast Options, Inc

Jacksonville, FL

At this end of this session, participants will be better able to list upcoming Medicare changes that will affect Medicare pain patients and their physicians; advocate for their pain patients through access to the Contractor Medical Director for the Medicare administrator in their geographic area; discuss national coverage decisions vs local coverage decisions; outline the medical review issues affecting pain medicine physicians.

1:45 – 2:30 pm

Proper Use of Opioids in the Pain Management Setting

Raphael Miguel, M.D., Professor and Chief Anesthesiology Service, Director of Pain Management Fellowship Program, H .Lee Moffitt Cancer Center & Research Institute

at the University of South Florida

Tampa, FL

At the end of this session, participants will be better able to describe the difference between a Florida Statute and a Board of Medicine Rule; describe the general tenets of the Florida Intractable Pain Statute; identify the 4 basic requirements which will reduce the likelihood of disciplinary action by the Board of Medicine when prescribing controlled substances; identify the most common deficiencies which lead to disciplinary action on one's medical license; recall the disciplinary guidelines associated with improper prescribing practices relating to controlled substances.

2:30 – 3:30pm

Biomechanics and Imaging and Pain

Joseph D. Fortin, D.O., Interventional Pain Medicine, Medical Director, STAR, Spine Technology and Rehabilitation PC, Clinical Professor, Indiana University School of Medicine, Jefferson Medical Clinic

Fort Wayne, IN

At the end of this session, participants will be better able to recite the basic physical principles of imaging modalities as well as an algorithm framework for interpretation; systematically apply diagnostic modalities toward unveiling elusive pain generators.

4 – 5 pm (1 hr):

Differential Diagnosis of Headache

Gary W. Jay, M.D., Neurology/Pain Medicine
Tamarac, FL

At the end of this session, participants will be better able to list the primary headache disorders; recite the primary differences in clinical diagnosis between the primary headache disorders; treat primary headache disorders.

Sunday, June 13 – Presentations: 8 am – 12 pm

Required Courses for Florida Physician Licensure Renewal (MD and DO):

8 – 9 am

Domestic Violence

Walter F. Lambert, M.D., Medical Director, CMS Child Protection Team, University of Miami School of Medicine, Professional Arts Center
Miami, FL

At the end of this session, participants will be better able to define domestic violence; discuss the prevalence of domestic violence; describe common injuries and behaviors to look for in a victim when suspecting domestic violence and neglect; identify appropriate referrals for victims of abuse; explain the importance of accurate and thorough documentation in cases of suspected abuse; state the legal implications regarding reporting victims of abuse.

9 – 11 am

Prevention of Medical Errors Course Entailing the Practice of Pain Management

Linda M. Blythe, RN, CPHRM, ABRM, FPIC, First Professionals Insurance Co.
Jacksonville, FL

At the end of this course, participants will be better able to recognize common performance and diagnostic errors related to the practice of pain management; implement risk management strategies to prevent such medical errors; describe the elements of a root cause analysis; and meet the requirements set forth by Florida Statute 456.013(7).

11 am – 12 pm

HIV/AIDS

Jose N. Moreno, M.D., Professor of Clinical Medicine, Infectious Disease Division, Department of Medicine, University of Miami School of Medicine
Miami, FL

At the end of this session, participants will be better able to describe modes of transmission (including from healthcare worker to patient and patient to healthcare worker); employ infection control procedures including universal precautions; discuss the epidemiology of the disease and related infections including tuberculosis; outline clinical management of the disease; outline prevention of the disease; recite current Florida law on AIDS and its impact on testing, confidentiality of test results and treatment of patients.
